TRENDS IN PHARMACOLOGICAL SCIENCES **REFERENCE EDITION**

Volume 12 **1991**

CONTENTS

JANUARY

Meeting Report
Receptor-gated ion channels may be selective CNS targets for ethanol, *Rueben A. Gonzales and Paula L. Hoffman* 1

Current Awareness
Biophysical and genetic analysis of the ligand-binding site of the β-adrenoceptor, *Michael R. Tota, Marialuisa Rios Candelore, Richard A. F. Dixon and Catherine D. Strader* 4
Cloning of a 'D_3' receptor subtype expands dopamine receptor family, *David R. Sibley* 7
Cloning and structure–function of the H_2 histamine receptor, *Nigel J. M. Birdsall* 9

Principles
Receptor classification using antagonists without determining pA_2 values, *Wolfgang Kromer* 11

Reviews
Progress in the development of potent bombesin receptor antagonists, *Robert T. Jensen and David H. Coy* 13
Differential modulation of tissue function and therapeutic potential of selective inhibitors of cyclic nucleotide phosphodiesterase isoenzymes, *C. David Nicholson, R. A. John Challiss and Mohammed Shahid* 19
The chronically infected cell as a target for the treatment of HIV infection and AIDS, *Stephen R. Petteway, Jr, Dennis M. Lambert and Brian W. Metcalf* 28
Pharmacological and functional diversity of neuronal nicotinic acetylcholine receptors, *Evan S. Deneris, John Connolly, Scott W. Rogers and Robert Duvoisin* 34

Books
Noradrenergic Neurons, *edited by Marianne Fillenz* 40
Animal Experimentation, The Consensus Changes, *edited by Gill Langley* 40
Use of X-Ray Crystallography in the Design of Antiviral Agents, *edited by W. Graeme Laver and Gillian M. Air* 41
Rational Therapeutics: A Clinical Pharmacological Guide for the Health Professional, *edited by R. L. Williams* 42

New edition 42

FEBRUARY

Meeting Report
Endothelin receptors cloned, endothelin converting enzyme characterized and pathophysiological roles for endothelin proposed, *David J. Webb* 43

Current Awareness
Clinical evaluation of 5-HT_3 receptor antagonists as anti-emetics, *Keith Bunce, Michael Tyers and Paul Beranek* 46
D_1/D_2 dopamine receptor interaction at the biochemical level, *Philip G. Strange* 48
Function and pharmacology of multiple $GABA_A$ receptor subunits, *Hartmut Lüddens and William Wisden* 49

Letter
Responses to NMDA receptor antagonists altered by epileptogenesis, *Wolfgang Löscher and Dagmar Hönack* 52

Principles
How we describe competitive antagonists: three questions of usage, *Donald H. Jenkinson* 53

Reviews
Nonpeptide angiotensin II receptor antagonists, *Pieter B. M. W. M. Timmermans, Pancras C. Wong, Andrew T. Chiu and William F. Herblin* 55

Molecular characterization of α_1- and α_2-adrenoceptors, *Jeffrey K. Harrison, William R. Pearson and Kevin R. Lynch* 62
FLAP: a novel drug target for inhibiting the synthesis of leukotrienes, *Anthony W. Ford-Hutchinson* 68
Structure and pharmacology of the proton-ATPases, *Nathan Nelson* 71

Books
Insulin (Handbook of Experimental Pharmacology, Vol. 92), *edited by Pedro Cuatrecasas and Steven Jacobs* 75
Adenosine and Adenosine Receptors, *edited by M. Williams* 76
Methodological Errors in Medical Research, *by B. Andersen* 77
Principles of Drug Action, The Basis of Pharmacology (3rd edn), *edited by William B. Pratt and Palmer Taylor* 77
Pharmacokinetics, *by S. B. Hladky* 78

MARCH

Meeting Report
Seeking a role for the clinical pharmacologist, *Patrick Vallance* 79

Erratum 81

Current Awareness
A physiological role for PAF in the stimulation of mammalian embryonic development, *Chris O'Neill* 82
$GABA_A$ receptor phosphorylation: multiple sites, actions and artifacts, *Nancy J. Leidenheimer, Michael D. Browning and R. Adron Harris* 84
Modulation of platelet aggregation by an L-arginine–nitric oxide pathway, *Marek W. Radomski, Richard M. J. Palmer and Salvador Moncada* 87
Chemical warfare: a position statement by the International Union of Toxicology 88

This and That: the fire of Galileo's imagination and putting teeth into toxicology, *B. Max* 89

Letters
Cysteine sulphinic acid as a candidate endogenous EAA ligand, *Roger Griffiths and John Dunlop* 94
Uniform distribution of CSA undermines neurotransmitter role, *Ian C. Kilpatrick, Sarah J. Waller and Richard H. Evans* 95

Principles
Physiological basis of multicompartmental models of drug distribution, *Arthur J. Atkinson, Jr, Tsuen Ih Ruo and Marilynn C. Frederiksen* 96

Special Feature
Interethnic variation of drug metabolism, *Werner Kalow* 102

Reviews
Immunotherapy of human immunodeficiency virus infection, *John W. Hadden* 107
The role of neuropeptide Y in cardiovascular regulation, *Philippe Walker, Eric Grouzmann, Michel Burnier and Bernard Waeber* 111
The expanding family of guanylyl cyclases, *Stephanie Schulz, Peter S. T. Yuen and David L. Garbers* 116

Books
Peptide Growth Factors and Their Receptors I and II (Handbook of Experimental Pharmacology, Vol. 95), *edited by M. B. Sporn and A. B. Roberts* 120
Fidia Research Foundation Neuroscience Award Lectures, *edited by J-P. Changeux, R. R. Llinas, D. Purves and F. E. Bloom* 121
Receptor–Effector Coupling, A Practical Approach, *edited by E. C. Hulme* 121

Software Review
ChemIntosh II, Cherwell Scientific Publishing Ltd 122

New edition 122

APRIL

Meeting Report
Multiple receptors found for the growing FGF family, *C. Jane Robinson* 123

Current Awareness
Nitric oxide as a neuronal messenger, *Solomon H. Snyder and David S. Bredt* 125
Role of NMDA receptors in memory, *Ivan Izquierdo* 128
Inhibition of the induction of nitric oxide synthase by glucocorticoids: yet another explanation for their anti-inflammatory effects? *Salvador Moncada and Richard M. J. Palmer* 130

Comment
Animal models as simulations of depression, *Paul Willner* 131

Viewpoint
Further subclassification of ATP receptors based on agonist studies, *Steve E. O'Connor, Ian A. Dainty and Paul Leff* 137

Reviews
Non-genomic and genomic effects of steroids on neural activity, *Bruce S. McEwen* 141
Pharmacological approaches to appetite suppression, *John Blundell* 147
Thromboxane synthase inhibitors, thromboxane receptor antagonists and dual blockers in thrombotic disorders, *Paolo Gresele, Hans Deckmyn, Giuseppe G. Nenci and Jos Vermylen* 158
Toxicology of mustard gas, *Uri Wormser* 164

Books
Comprehensive Medicinal Chemistry, *edited by Corwin Hansch* 167

MAY

Meeting Reports
Simultaneous Ca^{2+} imaging and electrophysiological analysis demonstrate source of Ca^{2+} for EAA receptors, *Graham Collingridge and Alison Abbott* 169
Subtypes of D_1 and D_2 receptors cloned 170

Current Awareness
Tyrphostins as molecular tools and potential antiproliferative drugs, *Alexander Levitzki and Chaim Gilon* 171
Intracellular control of inositol phosphates by their metabolizing enzymes, *Christophe Erneux and Kazunaga Takazawa* 174

This and That: error, observation and education in pharmacology, *B. Max* 176

Letters
Receptor classification using antagonists, *Dennis Mackay* 181
Selectivity of ethanol on ligand-gated ion channels, *Klaus Starke* 182

Principles
Role of partial agonism in selectivity of benzodiazepines, *Arnold H. J. Scaf* 182

Viewpoint
Does carbon monoxide have a physiological function? *Gerald S. Marks, James F. Brien, Kanji Nakatsu and Brian E. McLaughlin* 185

Reviews
Signalling targets for anticancer drug development, *Garth Powis* 188
Therapeutic potential of ACAT inhibitors as lipid lowering and anti-atherosclerotic agents, *Drago R. Sliskovic and Andrew D. White* 194
Structure–function relationships of the glycoprotein hormones and their receptors, *Leo E. Reichert, Jr, Bosukonda Dattatreyamurty, Patricia Grasso and Tomás A. Santa-Coloma* 199

Books
Studies of Narcosis: Charles Ernest Overton, *edited by Robert L. Lipnick* 204
Basic Facts for Basic Science, *by Radovan Zak* 205

Software Review
Easy Plot Version II, *Cherwell Scientific Publishing* 205

JUNE

Current Awareness
Agonist control of G-protein levels, *Graeme Milligan and Allan Green* 207
Endogenous digitalis-like factors, *Wilhelm Schoner* 209
Polymorphism in human *N*-acetyltransferase – the case of the missing allele, *Edith Sim and Dean Hickman* 211

Viewpoint
The real role of risk assessment in cancer risk management, *W. K. Lutz, J. Poetzsch, J. Schlatter and C. Schlatter* 214

Reviews
FK506 and rapamycin: novel pharmacological probes of the immune response, *Joseph Y. Chang, Suren N. Sehgal and Catherine C. Bansbach* 218
5-Hydroxytryptamine: a chameleon in the heart, *Pramod R. Saxena and Carlos M. Villalón* 223
β-Lactamase inhibitors and reversal of antibiotic resistance, *Robert Sutherland* 227
Cholecystokinin–dopamine interactions, *Jacqueline N. Crawley* 232

Books
The Healing Forest: Medicinal and Toxic Plants of the Northwest Amazonia, *by Richard Evan Schultes and Robert F. Rauffauf* 236

JULY

Meeting Report
ACE inhibitors can reverse blood vessel damage, *Pramod R. Saxena and Arie J. Man in't Veld* 239

Current Awareness
Specificity in the recognition process between charged carbohydrates and proteins, *Constant A. A. van Boeckel, Peter D. J. Grootenhuis and Cornelis A. G. Haasnoot* 241
The role of the kidney in the aetiology of hypertension: renal transplantation studies in rats, *Rainer Rettig and Thomas Unger* 243
Ion channels that are directly activated by cyclic nucleotides, *Gary Matthews* 245

This and That: scientific convictions and reflections on a cat's eye, *B. Max* 248

Reviews
Molecular enzymology of human liver cytosolic sulfotransferases, *Charles N. Falany* 255
$GABA_A$ receptor modulation of memory: the role of endogenous benzodiazepines, *Ivan Izquierdo and Jorge H. Medina* 260
Glycobiology: a growing field for drug design, *Karl-Anders Karlsson* 265
Structure and functions of human kininogens, *Raul A. DeLa Cadena and Robert W. Colman* 272

Books
Clinical Pharmacology, A Conceptual Approach, *by George Sweeney* 276
Manual of Microsurgery on the Laboratory Rat, *edited by J. J. van Dongen, R. Remie, J. W. Rensema and G. H. J. van Wunnik* 276
Handbook of Pesticide Toxicology, *edited by Wayland J. Hayes, Jr and Edward R. Laws, Jr* 277

AUGUST

Meeting Reports
Molecular cloning of angiotensin II receptors may presage further receptor subtypes, *Kevin Catt and Alison Abbott* 279
Molecular advances for the cytochrome P-450 superfamily, *F. Peter Guengerich* 281

Current Awareness
Wheel on the sweet smell of success, *Nigel J. M. Birdsall* 283
Characteristics of tetanus toxin and its exploitation in neurodegenerative studies, *G. Bagetta, G. Nisticò and N. G. Bowery* 285
Ca^{2+} influx following receptor activation, *Jacopo Meldolesi, Emilio Clementi, Cristina Fasolato, Daniele Zacchetti and Tullio Pozzan* 289

Letters
Regulation of G protein levels, *Mary Keen and Anke Krane* 292

Principles
Evaluation of two assumptions: single straight line, and single normal distribution, *Laszlo Endrenyi and Mayank Patel* 293

Reviews
Lithium and the phosphoinositide cycle: an example of uncompetitive inhibition and its pharmacological consequences, *Stefan R. Nahorski, C. Ian Ragan and R. A. John Challiss* 297
Haemoprotection against cytostatic drugs by stem cell inhibition, *Marie-Hélène Moser and Walter R. Paukovits* 304
5-HT receptors in human and animal cerebrovasculature, *Andrew A. Parsons* 310

Books
Excitatory Amino Acid Antagonists, *edited by Brian S. Meldrum* 315
Receptor Biochemistry and Methodology Volume 15: Serotonin Receptor Subtypes, *edited by S. J. Peroutka* 316

SEPTEMBER

Meeting Report
New influences of biotechnology in drug discovery: is the rat an endangered species? *Alan Harvey* 317

Current Awareness
Noradrenaline–ATP co-transmission in the sympathetic nervous system, *Ivar von Kügelgen and Klaus Starke* 319
The role of the metabotropic receptor in synaptic plasticity, *Roger Anwyl* 324
Molecular cloning of adenosine A_1 and A_2 receptors, *Joel Linden, Amy L. Tucker and Kevin R. Lynch* 326

This and That: the ethnopharmacology of simple phenylethylamines, and the question of cocaine and the human heart, *B. Max* 329

News
NMDA receptor subunit cloned, *Alison Abbott* 334

Special Feature
The *TiPS* Lecture: Functional aspects of the neuronal uptake of noradrenaline, *Ullrich Trendelenburg* 334

Reviews
Immunological approaches for probing receptor structure and function, *Suleiman W. Bahouth, Hsien-yu Wang and Craig C. Malbon* 338
Proto-oncogene transcription factors and epilepsy, *James I. Morgan and Tom Curran* 343
Molecular diversity of voltage-dependent Ca^{2+} channels, *Richard W. Tsien, Patrick T. Ellinor and William A. Horne* 349

Books
Biochemical Messengers, Hormones, Neurotransmitters and Growth Factors, *by D. G. Hardie* 354
New editions 355

OCTOBER

Meeting Reports
Vintage amino acid meeting describes new tools for amino acid research, subtypes of metabotropic receptors, *Jeremy M. Henley and Graham A. R. Johnston* 357
* 5-HT advances on four fronts, *Alison Abbott* 359

Current Awareness
New wave of non-NMDA excitatory amino acid receptors, *Raymond Dingledine* 360
Lipid metabolites and growth factor action, *Jacopo Meldolesi and Michele Magni* 362
Metabotropic excitatory amino acid receptors reveal their true colors, *Richard J. Miller* 365

Current Techniques
Nuclear magnetic resonance and differential scanning calorimetry as tools for studying drug–membrane interactions, *Joachim K. Seydel* 368

Principles
Testing models of agonism for G protein-coupled receptors, *Mary Keen* 371

Reviews
From neurotransmitter to gene: identifying the missing links, *Teresa M. Esterle and Elaine Sanders-Bush* 375
Chaos and illusion, *J. M. van Rossum and J. E. G. M. de Bie* 379
Amyloid deposition as the central event in the aetiology of Alzheimer's disease, *John Hardy and David Allsop* 383
* Receptors for neuropeptide Y: multiple subtypes and multiple second messengers, *Martin C. Michel* 389

Books
The Mesolimbic Dopamine System: From Motivation to Action, *edited by P. Willner and J. Scheel-Krüger* 394
Methods in Inositide Research, *edited by Robin F. Irvine* 395
Dictionary of Steroids (Chemical Data, Structures and Bibliographies) Volumes 1 and 2, *edited by R. A. Hill, A. N. Kirk, H. L. J. Makin and G. M. Murphy* 396

NOVEMBER

Meeting Report
Non-nicotinic mechanisms in ganglionic transmission, *Peter A. Smith* 397

Current Awareness
The enigmatic role of the sympathetic nervous system in chronic pain, *Martin Koltzenburg and Stephen B. McMahon* 399
The infant rat separation paradigm: a novel test for novel anxiolytics, *James T. Winslow and Thomas R. Insel* 402
Receptor-coupled phospholipase D and its inhibition, *Neil T. Thompson, Robert W. Bonser and Lawrence G. Garland* 404

This and That: the neurotoxicity of carbon dioxide, *B. Max* 408

Special Feature
Animal liberation or animal research? *Mark J. Matfield* 411

Reviews
New developments in cardiovascular magnetic resonance imaging and spectroscopy, *Markus Rudin, Wolfgang Zierhut, André Sauter and Nigel S. Cook* 416
Substrate-binding sites in acetylcholinesterase, *Ferdinand Hucho, Jaak Järv and Christoph Weise* 422
Excitatory amino acid receptors in the mammalian periphery, *Sándor L. Erdö* 426
Functions and mechanisms of interleukin 1 in the brain, *Nancy J. Rothwell* 430

Books
Channels, Carriers and Pumps. An Introduction to Membrane Transport, *by Wilfred D. Stein* 436
Methods in Enzymology, Vol. 195: Adenylyl Cyclase, G Proteins and Guanylyl Cyclase, *edited by Roger A. Johnson and Jackie D. Corbin* 436
Essential Molecular Biology, A Practical Approach, Vol. I, *edited by T. A. Brown* 437
New Editions 438

DECEMBER

Meeting Report
Clinical future for Ca^{2+} antagonists looks more promising, *Gerald Zernig* 439

Current Awareness
Role of adenosine in the trophic effects of sympathetic innervation, *W. Osswald and I. Azevedo* 442
Mode of action of the anti-migraine drug sumatriptan, *Patrick P. A. Humphrey and Wasyl Feniuk* 444
Co-secretion of multiple signal molecules from endocrine cells via distinct exocytotic pathways, *Pietro De Camilli* 446

News
Neher and Sakmann win Nobel Prize for patch-clamp work, *David Colquhoun* 449
NMDA receptor cloned 449

Special Feature
Pharmacological control of altitude sickness, *John H. Coote* 450

Reviews
Taking stock of cognition enhancers, *Martin Sarter* 456
Heterogeneity of the endothelial cell and its role in organ preference of tumour metastasis, *Sean A. McCarthy, Isinsu Kuzu, Kevin C. Gatter and Roy Bicknell* 462
The neurobiology of tobacco addiction, *Ian P. Stolerman and Mohammed Shoaib* 467

Books
Drug and Anesthetic Effects on Membrane Structure and Function (Advances in Membrane Fluidity, Vol. 5), *edited by Roland C. Aloia, Cyril C. Curtain and Larry M. Gordon* 473

Software Review
BALL & STICK Version 3.0, *Cherwell Scientific Publishing* 474

*** Errata**
5-HT advances on four fronts, *by Alison Abbott* 448
Receptors for neuropeptide Y: multiple subtypes and multiple second messengers, *by Martin C. Michel* 448
